

THE FRENCH *TOUCH*

COMFORT FOR EVERYONE, EVERYWHERE

Objects you use every day without thinking about it. From hand dryers which have become iconic to soap dispensers. In every restaurant, cafe, airport and office, equipment from JVD's Hygiene universe accompany your daily routines. Many of our Hygiene products are certified sustainable, in France (in Rezé) and respectful of our planet, to preserve it for the generations to come.

ASHTRAYS

At JVD, there is no room for boredom. We are proud to present our catalogue of 2020/2021 collections to you, just brimming with new items: JVD does not believe in simply copying and pasting! Our team have been working tirelessly in Nantes, Singapore, Alicante and Mexico City to offer you and your customers innovative cleanliness solutions which are even more eco-responsible and always designed with use comfort in mind.

Our team has expanded to include new people and new expertise so that we can continue on our trajectory of innovation. We have invested in IoT technologies to offer you the next generation of smart equipment. Our vision of smart hygiene includes improved cleanliness and customer satisfaction, plus a meaningful day-to-day experience for hygiene professionals.

Because JVD is an engaged company, now more than ever. Our products are made in France, at our factory in Rezé, near Nantes, from our hand dryers to our soap dispensers. Each product in this catalogue was designed to last and to be recycled, and all our manufacturing processes are carefully considered in order to reduce their impact on the planet. We have created the first hand dryer made from shells, from a perspective of reusing waste as part of the circular economy.

JVD's products are designed for you, and thanks to you, we are able to enhance them. We are here to listen to you so we can understand your needs. We also hope to surprise you with our 2020/2021 collection.

Thank you for trusting us with your business.

Thierry Launois,
JVD CEO

INNOVATION IN THE SERVICE OF WELL-BEING

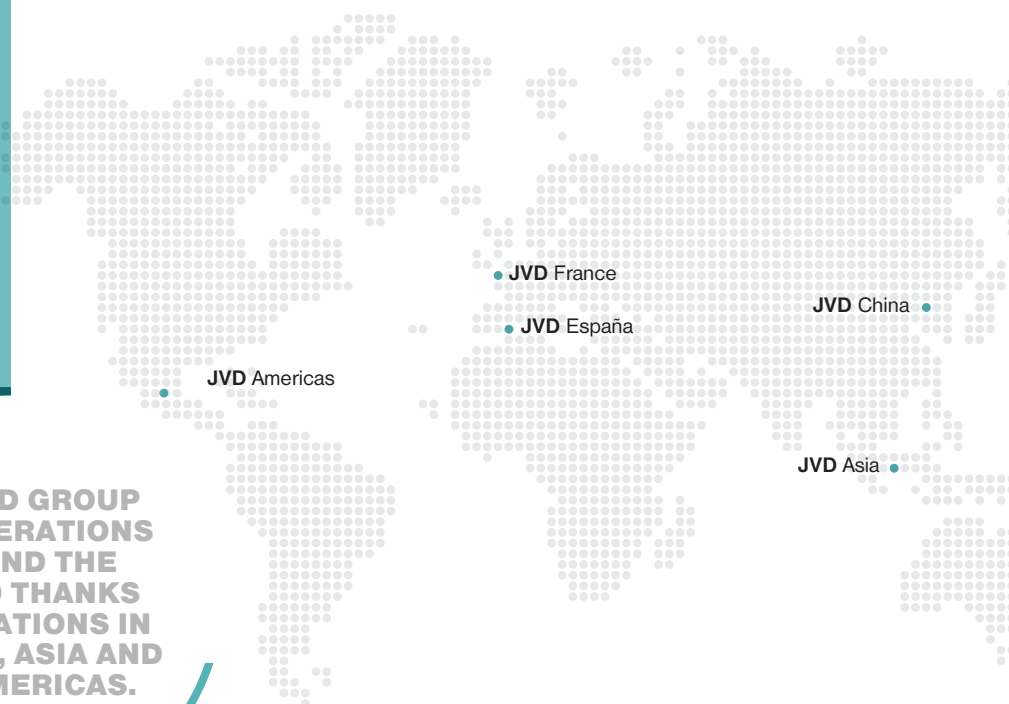

For more than 35 years, JVD has been supporting communities by offering them hygiene equipment that is simultaneously innovative, eco-responsible and of high quality, with a French design, to increase user comfort and simplify the work of cleaning staff.

VALUES AND TALENT

KNOW-HOW

Backed by 35 years of experience, our teams have fully mastered the design and manufacturing processes. Our teams conceive, design, manufacture and rigorously test our products. From receipt of the smallest component to customer service, our solid industrial processes guarantee the quality you have come to expect from JVD. We want to provide all our clients with the best possible service and to offer everyone products which are useful, ecological, practical and attractive. 40,000 hand dryers and 400,000 paper and soap dispensers are produced each year at our site in Rezé, in France's Loire-Atlantique Department.

THE JVD GROUP HAS OPERATIONS AROUND THE WORLD THANKS TO LOCATIONS IN EUROPE, ASIA AND THE AMERICAS.

RESPONSIBILITY

In an era when planned obsolescence has become the norm, JVD is committed to providing sustainable products to our clients. We have always been convinced that the strategy of today should be to improve the strategy of tomorrow. Between design, manufacturing, transport, use, customer service and recycling, each step in JVD's production of our accessories is organized down to the smallest details so as to conserve resources. All the employees at JVD are driven by a commitment to our planet's future.

INNOVATION

Our power of innovation is enriched by 35 years of expertise on our R&D team and by our partnerships. Our in-house R&D team continuously develops new solutions to put innovation to work for user well-being. Over the years, our research office has worked with the biggest names and fresh talent from French industry to create enhanced-performance hygiene and hotel equipment and accessories. The result of three years of internal research, followed by close collaboration with future users, Hygiacconnect is the embodiment of JVD's innovativeness. With the rapid advancement of smart cleaning, JVD is inventing the hygiene of tomorrow, today.

OUR HISTORY

1984	1988	1991	1997	1999	2006	2007	2015	2018
Creation of JVD	JVD develops its first hand dryer and becomes a manufacturer	JVD develops its hair hair dryer	JVD creates its own Engineering Department	Creation of JVD Asia subsidiary in Singapore	JVD creates its own integrated design service	Creation of JVD España subsidiary in Spain	Creation of JVD Americas in Mexico	Launch of Hygiacconnect, the world's leading smart hygiene platform

COMMITMENT TO ECO-RESPONSIBILITY

Eco-responsibility has been one of JVD's pillars from the very beginning. The company's commitment on this subject only grows stronger every day and now concerns each of its different levels. JVD is dedicated to the idea of transmission and makes it a point of honour to play an active role in an ecological transition which looks out for everyone's well-being.

BORN TO BE GREEN

You might think we're mad but, if our products lasted 20 years without you having to replace them, we would be thrilled! At JVD, we design quality products meant to withstand the test of time.

1

WORKING AND PRESERVING

We have always been convinced that the strategy of today should be to improve the future of tomorrow. All the teams at JVD strive actively to think of everything and to make a real difference. From design to manufacturing, transport to use and customer service to recycling, we know that each detail counts.

2

ECO-DESIGN

Whether we're talking about our next-gen jet air hand dryers which reduce energy consumption and eliminate the use of any consumables, our flow-reducing soap dispensers or our foaming soap which drops consumptions levels by four, our R&D Department endeavours to design our products to be eco-responsible.

3

RAW MATERIALS AND PARTNERS

Eco-responsibility also concerns our choice of raw materials and partners. Whenever possible, we prioritize partners located as close as possible to our production unit so as to reduce the environmental impact of our transport. For years, we have been striving to ensure that expertise endures and so encourage our suppliers' capacity for innovation. Out of concern for our social impact, we work with associations from the social and solidarity economy.

6

COMBATING PLANNED OBSOLESCENCE

At JVD, our products are designed and tested to be repairable and to repair them. Our appliances' spare parts are available for 10 years. Quality products meant to be used and to run for the long term.

4

MANUFACTURING

All our waste is sorted and collected before being sent to a treatment and recycling centre. For example, we reuse our suppliers' cardboard boxes for our shipments, and we grind used paper and then use it as wedges for our shipped products. What about the rest? It is recycled or reused by other companies in the region!

5

LOGISTICS

Our packaging is designed with a twofold objective: to protect the integrity of the transported goods and to serve as an installation diagram. These simple, sensible optimizations further reduce our carbon footprint.

COLLECTIONS

JVD offers a broad selection of equipment, lines and colours to adapt to your environment and make it unique. Thanks to our mastery of product design to production, JVD is the only manufacturer able to offer matching sets ranging from hand dryers to toilet roll dispensers by way of soap dispensers.

BLACK COLLECTION

Black has the virtue of endowing an object with a more qualitative value. Whatever the ambience of the place, black products can fit in easily (and can be either discreet or highly visible). The matte aspect amplifies the qualitative side of the product and makes the solution less dirty and more scratch resistant. Ever in pursuit of solutions which can minimize our environmental impact, the black color has given us the opportunity to use recycled plastic.

NEW

YALISS STAINLESS STEEL COLLECTION

PRODUCT ADVANTAGES

- Anti-vandalism (304 Stainless steel)
- Suitable for large paper towel formats
- Secure lock with key
- Easy change of consumables

YALISS COLLECTION

The more pronounced character of the Yaliss collection seeks to give your washrooms a new image between gentleness and liveliness. The products provide new responses to broader requirements: larger capacities, universal or removable cores and improved hygiene, whilst retaining all the qualities of the Cleanline collection (ease of use, personalization, etc.). To date, this is the most complete collection for fitting out your washrooms.

METAL COLLECTION

The use of stainless steel and simple lines for this collection gives it a robust appearance. Conversely, the opening for a more carefully worked view of the levels adds a touch of refinement to the design. The final solution is a perfect match for heavy traffic locations.

CLEANLINE COLLECTION

The Cleanline collection was designed to be both classic and timeless. Its rounded shapes and straight sides allow it to fit seamlessly and discreetly into any type of washroom. Its bevelled edges endow it with modernity and character. Its charcoal grey base seems to lighten up the volume. The collection's success hinges on the possibility of personalizing the appliances with our clients' logos, as well as their simplicity and practicality.

KIDS COLLECTION

The purpose of our Kids range is to help children to learn the basics of hygiene from a very young age. By making the experience of washing and drying their hands more enjoyable, JVD provides a comprehensive solution, suitable for environments visited by children. Thanks to our powerful yet quiet hand dryers, JVD also helps to keep washrooms clean, with no wet paper roll on the floor and no clogged pipes. By limiting their use of paper products, kids can also participate in the creation of a greener, more sustainable future by reducing the carbon footprint associated with using paper.

HYGIACONNECT

SMART CLEANING

BY JVD

**A COMPLETE,
CONTROLLED
SOLUTION**

**100% MADE
IN FRANCE**

KEY BENEFITS

BE WARNED

In case of imminent rupture, the connected device sends you an alert in order to plan an intervention as quickly as possible.

ANALYSE & REPORT

Using reporting, analyze in detail the consumption of consumables in your dispensers, their availability, the use of your premises, its maintenance, the quality of the atmosphere.

OPTIMIZE YOUR COSTS

Manage your supplies stocks as precisely as possible, Optimizing interventions and reducing logistics costs. Reduce your CO 2 emissions by limiting unnecessary travel. Less waste thanks to optimal use of consumables.

Click to
learn about
Hygiaconnect in
video

HYGIACONNECT is a connected solution ensuring the comfort and hygiene of all spaces welcoming public.

EASY TO DEPLOY

Each equipment is equipped with sensors and antennas. The data is sent to the JVD server in the cloud and is then available from the JVD software in SaaS mode.

TRACK AVAILABILITY IN REAL TIME

Hygiaconnect allows you to know at any time the level of paper/soap in your dispensers and waste in your bins. Upon imminent consumable depletion, the app sends you an alert to find where and when to take action.

MANAGING THE SATISFACTION LEVEL

Thanks to Hygiascan, you follow in real time the satisfaction of the users of your sanitary. Hygiascan allows you to follow in real time the users' attendance and the intervention of the maintenance teams.

HAND DRYERS

GOING EVEN FURTHER TOGETHER

PRESERVING IS GREAT, BUT REBUILDING IS EVEN BETTER!

Although we had always worked to preserve the environment and reduce our footprint as much as possible, it was time for us to move on to the next step and become a real actor for ecological restoration. We also wanted to help spread our values by engaging our clients in this shared outlook. This is why we reached out to the association Planète Urgence and established a partnership with them to fight deforestation in Indonesia and Cameroon.

A VERY SIMPLE MECHANISM

It couldn't be any simpler: for each hand dryer purchased from the Air range (Exp'air, Stell'air, Copt'air and Sup'air), a tree is planted!

OUR ACTIONS IN CAMEROON

Our partnership aims to support the restoration of degraded areas around the Bénoué National Park and increase the resilience of ecosystems and riparian communities, by reforestation of multi-use trees and support for the emergence of cashew nut sector.

48 000

THE NUMBER OF TREES PLANTED
SINCE WE LAUNCHED THE OPERATION,
1 HAND DRYER = 1 TREE.

INDONESIAN MANGROVES

Indonesia is home to the largest expanse of mangroves in the world, but it has been on the decline for decades and its gradual disappearance is hurting not only coastal species but also populations whose livelihoods come primarily from fishing. A whole ecosystem is in danger and needs to be protected.

1 200

This is the number of people who work thanks to our donations. Indeed, our reforestation operation is an ecological action, but not only. It is a way to participate in the food and economic security of most vulnerable populations. More than 5,000 people are now benefiting from this operation.

HAND DRYERS

A hand dryer should not be chosen at random. Whether your constraints relate to usage, maintenance, noise or vandalism resistance, we have a large array of equipment suited to your environment.

HOT OR COLD AIR

If the washroom in question has little to no heating, a cold sensation during hand drying can be unpleasant. And so we recommend opting for a hand dryer which uses evaporation or jet air with a heating element.

VANDALISM RESISTANCE

In some places, special attention needs to be given to vandalism resistance. Standard NF EN 62262 provides a clear interpretation of this level of resistance with the IK index. IK10 is the highest level of resistance. A device of this type is able to tolerate at least a blow from a 5 kg sledgehammer. Devices with an aluminium or steel cover are even more resistant.

NOISE

The sound of a hand dryer can become a nuisance if located nearby an office or restaurant dining room. Most hot air hand dryers are relatively quiet. Some jet air hand dryers also manage to combine power with a low noise level.

MAINTENANCE

Paper rolls require flawless logistics to prevent them from running out. Some hand dryers require no maintenance while others have a water recovery tray which needs to be emptied regularly and air filters which need to be replaced or cleaned periodically.

ECOLOGICAL FOOTPRINT

It takes 17 trees to produce one tonne of paper. Its manufacturing and transport then generate significant amounts of CO₂. For example, the French leader in paper consumables generates 30,000 tonnes of CO₂ annually, just to transport its paper within France.

In this respect, hand dryers are the ideal solution for reducing your ecological footprint. Next-gen jet air hand dryers consume very little energy, and the absence of consumables renders the impact of transport anecdotal at best.

USAGE LEVEL

A hand dryer should provide a solution which is compatible with the level of usage of the washroom. For places with little usage (< 50 visits daily), all three solutions are possible. For places with normal usage (50-250 visits daily), the cost of paper becomes prohibitive.

For places with high usage (250-400 visits daily), jet air hand dryers are the only solution capable of guaranteeing cost control and a fast drying time.

Lastly, for places with intensive usage (> 400 visits daily), the chosen hand dryer should have a brushless motor or an induction motor.

HAND DRYERS

INTEGRATED SOLUTIONS

For more than 30 years now, we have been imagining and building built-in solutions to meet complex technical constraints. Backed by our expertise in hand dryers, particularly for railway applications, we can scale any form of solution for our clients around blown air: drying for industrial parts, space heaters, use in severe, restricted or confined environments, and so on. Our mastery of simulations of systems' air flow behaviours allows us to very quickly reach perfectly effective, personalized solutions.

Olivier DE BARBEYRAC
Technical Manager

EXPERTISE

Having dealt with the most varied constraints over more than 30 years, we put our know-how at your disposal to provide you with fast responses and effective solutions.

DESIGN & ERGONOMICS

Between design, efficiency and footprint limitations, you undoubtedly have multiple expectations. We can take all those demands into account to devise a completely personalized solution for you.

Fluid mechanics

PUSHING THE LIMITS OF INNOVATION

- Space constraints
- Aesthetic constraints
- Normative constraints
- Acoustical constraints
- Meteorological constraints
- User behavioural constraints

BESPOKE DEVELOPMENT & PRODUCTION

Our R&D Department designs and develops each bespoke built-in system for some of the most complex and difficult environments: railway, industry, communities, high altitude, etc. Based at the same site in Nantes, our R&D and manufacturing teams work closely together to ensure flexibility and agility in the development and implementation of our clients' projects.

PRODUCT ADVANTAGES

- Brushless motor with a very long lifespan
- Power: 2000 W
- 6 drying settings
- Fitted with an ionizing system

CHARACTERISTICS

- Power supply: 230 V - 50/60 Hz
- 6 drying settings:
Air flow: 55 & 85 m³/hr
3 temperatures
- A button for the cold position
- CE - Class II - IP20
- Volume area 2'
- 3 year warranty
- Dim. : 264 (L) x 266 (H) x 90 (D) mm
- Cable length: 2270 mm

PAPER **DISPENSERS**

PAPER DISPENSERS

With their optimized design and ergonomics, our paper dispensers are conceived and developed to be easy to use and to maintain.

DISPOSABLE PAPER

Disposable paper rolls without cores are compatible with centre pull devices.

Disposable paper rolls with cores are compatible with auto cut devices. They come in the form of spools of different diameters and different lengths. Please note that some spools are only compatible with proprietary solutions.

PAPER TOWEL FORMATS

Disposable folded paper is compatible with zig-zag devices. They are classified according to how the sheets are folded:
 Interleaved paper: Wor Z
 Zig zag paper: V
 Folder paper: C

NEW

STAINLESS STEEL RANGE

- Anti-vandalism (304 Stainless steel)
- Suitable for large paper towel formats
- Secure lock with key
- Easy change of consumables

2 POSSIBLE SOLUTIONS

Two solutions coexist on the market today. For proprietary solutions, the equipment is usually free or sold at a reduced price. The equipment then only works with that brand's consumables which tend to be more expensive. Conversely, the open solutions from JVD's product range are invoiced in the beginning but allow you to use any brand of consumable (including brands which offer proprietary equipment).

CLEANLINE COLLECTION PAPER DISPENSERS

BENEFITS OF THE CLEANLINE COLLECTION

MADE IN FRANCE

Our products are backed by JVD's 30 years of experience and are 100% designed and manufactured in France.

SECURE LOCK

The Cleanline collection is fitted with a removable key. A permanent key is also available (optional)

EASY TO CHANGE OUT CONSUMABLES

The Cleanline collection is compatible with most consumables on the market, their levels are always visible, and they are easy to access.

PERSONALIZABLE

The Cleanline collection is completely personalizable and can bear the client's brand name or logo.

Spool Support desktop

REF 8 99 1238
Wall-mounted Spool Support

PRODUCT ADVANTAGES

- Easy to tear paper: plastic saw built into the cover and held in place by pressure from 2 side springs

CHARACTERISTICS

- Tubular metal structure (Ø 20 mm): White Epoxy finish
- Green ABS cover
- Capacity: 1 spool of industrial paper
- Dim. (desktop):
530 (L) x 910 (H) x 405 (D) mm
- Dim. (wall-mounted): 360 (L) x 360 (H) x 405 (D) mm

A black and white photograph of two men in white lab coats standing at a sink. The man in the foreground is washing his hands under a running faucet. The man behind him is also washing his hands. The background is blurred, suggesting a laboratory or clinical setting. A teal-colored rectangular overlay is present in the top right corner of the image.

SOAP
DISPENSERS

SOAP DISPENSERS

SOAP, SANITIZER GEL OR FOAMING SOAP

AUTOMATIC SOAP DISPENSERS

Automatic soap dispensers are becoming increasingly common in washrooms. They are more hygienic as no contact with the device is required. They can also be more economical by limiting the flow.

Soap is available in two forms. Gel soap is the most common one on the market. Soap also comes in a foaming version. With a suitable dispenser, this solution can cut soap consumption by 4 and water consumption by 50%.

SOAP IN BULK OR A CARTRIDGE

Two solutions coexist on the professional soap dispenser market. Proprietary soap dispensers with cartridges need to be replaced whenever the cartridge is empty. Solutions with an integrated container make it possible to use bulk soap (from a container). This solution is more economical and more ecological (less packaging).

THE PUMP: A KEY COMPONENT OF THE DISPENSER

Inside the dispenser, the pump is the part which manages the delivery of the soap. A pump's performance can be measured based on two criteria: its capacity to limit the flow and its longevity.

ECONOMICAL
THE FLOW REDUCER CAN CUT THE CONSUMPTION OF GEL SOAP IN HALF

ECOLABEL IS A EUROPEAN ECOLOGICAL LABEL

Based on the principle of a "global approach" which "considers the product's life cycle from the extraction of raw materials to manufacturing, distribution and use, all the way to its recycling or disposal after use". Quality and uses are also taken into account.

1/4

A foaming soap dispenser can cut consumption by up to 4 times

FLYING INSECT KILLERS

FLYING INSECT KILLERS

For areas where food is prepared and/or handed over to consumers, Article 3 of the French order of 28 May 1997 and Article 3 of the order of 9 May 1995 specify that those areas must be free from any risk of contamination and define the obligation for protection against the presence of insect pests.

OPERATING PRINCIPLE

A flying insect killer is an illuminated electrical device which attracts flying insects with ultraviolet A rays (harmless to people) and then either electrocutes them, traps them with glue or aspirates them.

WHICH INSECTS?

Flying insect killers are designed to attract and kill flying insects, particularly flies and mosquitoes but also midges, wasps, hornets, horseflies and more.

WHERE SHOULD YOU INSTALL IT?

For optimal operation, your flying insect killer must be placed in a warm, dark place, sheltered from draughts and up in the air (whether mounted or hanging).

GLUE OR ZAPPER?

Bug zappers are non-polluting (no chemicals and no odours). They are safe (the high-voltage grids are always protected). Their recovery trays need to be emptied.

Glue traps are non-polluting (no chemicals and no odours). They are safe. They do not cause any crackling or throw off any insect parts. They are perfectly suited to places with significant hygiene constraints. Their glue strips need to be replaced on a regular basis.

IP54 INDEX DEVICES?

IP54 devices are suitable for **very humid environments**. They are protected against sprays of water.

FRAGMENT RETENTION TUBES?

Unlike standard tubes, fragment retention tubes are covered with a **protective film** which avoids broken glass in the case of a blow. Fragment retention tubes are recommended for the agrifood industry in particular.

WASTE SORTING

Sorting recyclable waste at the source has been an obligation since 1 July 2016 (French Decree 2016-288 of 10 March 2016 implementing the Energy Transition for Green Growth Act).

SORTING FLOWS OF PAPER, METAL, PLASTIC, GLASS AND WOOD IS COMPULSORY

For whom?
For companies, shops and administrations which entrust their waste to a private company or which generate more than 1,100 litres of waste per week and which use a public waste collection service.

SORTING OFFICE PAPER AT THE SOURCE IS COMPULSORY

1 JULY 2016

For organizations with 100 or more administrative jobs

1 JANUARY 2017

For organizations with 50 or more administrative jobs

1 JANUARY 2018

For organizations with 20 or more administrative jobs

ASHTRAYS

ASHTRAYS

JVD's ashtrays are **robust** thanks to their thick walls, treated for **outdoor use** and UV resistant. They are **practical** and easy to empty as they are fitted with inner containers as well as an **anti-vandalism lock**. Each ashtray comes with a **kit to install it** on the wall or in the ground.

WALL-MOUNTED ASHTRAYS

Wall-mounted ashtrays are to be fixed to the wall. Made of painted steel or stainless steel, they are very discreet and work great anywhere thanks to their compact size.

STANDING ASHTRAYS

Standing ashtrays are set up directly on the ground, where they can be fixed or not so they can be moved. Whether made of painted steel or stainless steel, their delicacy adds a touch of elegance to your smoking areas.

FRENCH DECREE 2015-337

In Paris and most other cities and towns in France, the fight for cleanliness has become a priority. As a result, people who drop litter on public roads may receive a €8 ticket. Establishments which are open to the public are therefore motivated to provide solutions: ashtrays, bins and combinations of the two can help contribute to meeting this policy. Additionally, regulations on sidewalk cafés have become stricter. Because of this, many sidewalk café charters have been put in place or updated to compel owners to provide ashtrays to their customers.

ASHTRAYS WITH BINS

Ashtrays with bins can save space while keeping your outdoor areas clean. They allow employees and visitors to throw out waste like cups and packaging.
